(NO REPLY
SENT)

MEMORANDUM FOR: ^{Re} W. J. Wollenberg

SUBJECT : TOD

The following is in reply to your memo of May 7, 1968.

1. The first sentence of your paragraph one is in error, i.e., we are not and have not treated all support as general support. I refer you to section III, B of the TOD Committee approved "Instruction and Definitions for Target Oriented Display." **General Support** inputs continue to meet this definition.
2. With regard to any ~~such~~ figure such as 80% of given resources to be targeted, this is and was merely an arbitrary goal (which in fact we have already achieved).
3. General Support and its sub-categories will be separately displayed. I thank you for the list of CIP and ~~CIP~~ resources in this area. As to the eventual formats in the TOD Committee Report, I am sure the Committee will be able to arrive at an acceptable solution.
4. As a technical point, I would add that the "measurement of the validity of the representation of the resources which are targeted" which you speak of, can hardly be proclaimed by the arbitrary selection of a percentage of resources to be allocated and prorated under any conditions.
